

Site Specific Builders Temporary Supply Agreement

Connection Details

Orion ES number (if existing application):

Site address:

Safe Power Services builders temporary supply box required? **Yes** **No**

Our standard BTS's are: single phase with two double 10amp outlets. If you require multi-phase temporary power or specialised outlets, please make note of requirements.

Preferred connection:

Our default process is to lodge the temporary and permanent connections within the same/initial application to Orion. This allows us to avoid potential delays at the end of the job as Orion approval for the permanent connection is granted at the beginning of the job. Please inform us if any job will not require a new permanent connection at the end of the lease.

Unmetered temporary? **Metered temporary?**

Preferred livening date:

Note this date is not guaranteed and is dependent on availability and existing scheduled workload.

Connection period (please select):

Six-months 6-12-months 12-18-months 18-months plus

Temporary connection size: **Phase** **Amps**

Permanent connection size: **Phase** **Amps**

Number of permanent connections:

Hot water type (please select):

Electric Gas Solar

Preferred permanent livening date:

CT Connection Details (required for connections greater than 100amps)

Delivery address for CTs:

CT ratio:

Bore size: 45mm 68mm 88mm

Base/bar mounted:

Service mains size and type:

**NOTE: If this is a new sub-division, please supply a stamped Council street numbering plan.
We will not be able to submit your application to Orion without this**
